Edition 5.1

The Architrave, Skirting & Door Specialist

About Australian Moulding & Door Company (AMDC)

Australian Moulding & Door Company has the style, range and quality you need!

Proudly Australian-owned and with over 20 years experience of providing excellent customer service, AMDC offer quality products and solutions, whether you're building or renovating.

We manufacture the largest and most comprehensive range of skirtings, architraves, doors and accessory mouldings including picture rails, corner blocks and bolection moulds from all periods of Australian housing.

Our range of housing eras includes the Victorian, Federation, Edwardian, Colonial & Post War eras through to Modern & Contemporary homes.

With over 5,000 different profiles our extensive range can be produced from Moisture Resistant Medium Density Fibreboard (MRMDF) or any timber including, Finger Jointed Pine, Clear Pine, Meranti, Oak, Western Red Cedar, Kiln Dried Hardwood (KDHW) and any other timber on request.

This results in our products being of the highest quality and finish.

AMDC understand that creating a beautiful, comfortable and functional home takes time and experience.

Our dedicated staff, with extensive experience in the building industry are ready to provide a personal approach to achieve professional results.

NEED BESPOKE MOULDINGS & DOORS?

We understand how bespoke mouldings & doors can add to the authenticity of your build and can advise you on the right option for your specific purposes. AMDC offer;

- Skirtings and architraves
- Cornice moulds
- Picture rails
- Bespoke doors
- Dado rails
- Routed doors in Raw MR MDF
- Bolection moulds
- Solid timber joinery doors
- Lining boards
- Window nosing
- Entrance doors and jambs
- Curved architraves
- Flush panel doors
- Insert moulds

QUALITY PRIMED FINISH

You don't have to worry about preparing your skirtings or architraves. Australian Moulding & Door Company saves you time by offering an exclusive state-of-the-art priming line. Our skirtings and architraves can be pre-primed and sanded to a top-quality finish ready for you to paint. * Note- we cannot pre-prime doors.

A PERFECT MATCH!

Apart from supplying standard profiles, we cater to your specialised needs by offering a custom profile-matching service, enabling us to replicate almost any shape requested, providing you with a perfect match.

No job is too big or too small, and we can supply short run requirements for any architrave, skirting or accessory moulding.

ONE PROFILE, MANY SIZES

The illustrated profiles in this catalogue come in a range of different sizes.

Ultimate Primed Finish comparison to an on-site painter for cost and time prior to final coat application stage. The above comparison graph is based on an average sized home of 28 squares using 90 x 18 Architrave 60/5.4 & 180 x 18 Skirting 35/5.4. The Ultimate Finish is 90-95% ready for immediate topcoat application allowing for substantial cost saving.

Colonial

1800'S - 1849

The Australian Colonial period reflected growing prosperity in our nation. The typical Colonial home is very simple with few decorative features. It was originally influenced by the British Georgian and Regency periods throughout the 19th century.

Attributes of a typical Colonial home include symmetrical design, corrugated iron roofs, brick chimney stacks, multi pane sash windows, six panelled doors, brick quoining, external shutters, wide wrap-around verandas, hipped roofs and stone or brickwork.

Victorian

1850 - 1901

Victorian home architecture incorporates various styles ranging from classic facades and Georgian styles, to extremely ornate and decorative embellishments. “More of everything” was a trademark of the era.

Typical features of this period include decorative cast iron or lace work, terrace housing, steep pitched roofs, fretwork, chimney stacks, multi-coloured brickwork or red brickwork, stain glass windows, double pane windows, oriel windows and curved verandas.

Federation / Edwardian

1890'S - 1920'S

Federation and Edwardian style homes were one of the first distinctively Australian homes. Their design embraced the outdoor lifestyle of the Australian people. They are often very picturesque and eye catching.

Characteristics of a Federation/Edwardian style home include terracotta tiled roof, asymmetrical roof lines, gable and motifs, leadlight windows, high ceilings, plasterwork, ceiling roses, finials and brackets, red-brown brickwork, decorative timber verandas, and timber fretwork.

Late Edwardian / Californian Bungalow

1915 - 1930

The Californian Bungalow was a style originally imported from Los Angeles. Also known as the “Cal-bung”, it is a solid and respectable house. With a heavy and firm appearance, it is easily recognisable by a number of distinctive characteristics.

Californian Bungalows are usually single storey with double or triple low gabled roofs, painted with batons, wide eaves with exposed rafters, stained glass windows, thick masonry veranda piers or pillars, rough rendered walls, dark bricks, enclosed front porches, high-waisted doors, terracotta shingles or tiled roofs and panelled or wainscoted walls.

Art Deco/ 1930's

1930 - 1939

In Australia "Art Deco" refers to the 1930's. The style originated in France in the 1920's following the popular art nouveau movement, although a Hollywood influence was also apparent. An understated elegance together with the use of geometric motifs and characteristic colours are associated with the art deco era.

Other common components of houses of this era include flat roofs, porthole windows, curved glass, steel framed windows, zigzags and geometric shapes, clean lines, curved motifs, glass bricks, bright pastel colours and hand rails lining balconies.

1940's / Post War

1940 - 1949

The Post War style homes are simple and modern in design, and usually made from weatherboard, asbestos cement or brick veneer. Materials were scarce during this time, reflecting both the economic constraints and the move towards contemporary designs.

Building forms were simple with limited embellishments, set well back from the street with skillion, flat or butterfly roofs, metal casement windows, weatherboard cladding and few plaster or cornice moulds.

Modern / Contemporary

1950 - PRESENT

Housing in Australia hit a boom period after the war. There was a growing availability of mass produced building components and materials. A new lifestyle was adopted and reflected in the interior and exterior design of many modern homes. The term “less is more” is evident for modern and contemporary homes.

Trends of today include such characteristics as open plan living, box like facades, striking contrast colours, patios, minimalism, clean lines, large windows or walls of glass windows, skylights, geometric shapes, traditional hip and architecturally designed split skillion roof, rendered or plain brick walls, atriums, planter boxes and landscaped and manicured gardens.

AMDC Door Range

WHEN QUALITY AND CHOICE MATTERS

The Australian Moulding and Door Company is not your average door company. As well as our standard range of doors, we pride ourselves on being able to create made-to-order doors to suit your design.

AMDC product offering includes:

- Routed doors in Raw MR MDF
- Bolection and insertion mouldings
- Solid timber joinery doors
- Entrance doors and jambs
- Timber pivot systems
- Custom internal jambs
- Flush panel doors made to any size
- Timber lining boards
- Custom manufactured to match existing doors
- Barn style sliding doors

The Australian Moulding and Door Company is proud to manufacture our range of timber doors using a mix of the latest CNC technology and traditional techniques.

All doors are manufactured to the highest quality standards using various timbers and engineered timber products. All our Kiln Dried Hardwood door range is built using only Select Grade hardwood timbers.

DOOR SIZE

Specify any custom size

Height X Width mm

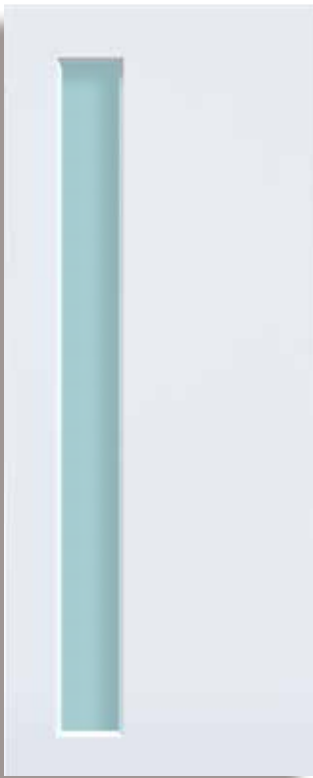

Note large doors

Please note for door sizes over 2400mm in Height or 1200mm in Width it is strongly recommended that a steel frame is used to reduce the risk of warping. Please talk to one of our team about the addition of steel frame for oversize doors.

Note: Doors are supplied as raw MR MDF finish
