

ROOF & WALL WRAP / PERMEA NEW INFORMATION FOR MAY 2023

The new changes proposed for May 1, 2023 under the NCC (National Condensation Committee) are as follows:

- Traditional Foils (Non Perforated) can only be used in roof spaces if over 95gsm.
- Breather Foils can only be used in single skin brick and concrete facades in some areas.
- Class 4 Vapour Permeable Membranes to be used in all other membrane types. Super Permea is Class 4 Vapour Permeable and high water barrier and is suited to be used in conjunction with James Hardie, Weathertex, CSR and all other cladding systems. Super Permea is the most vapour permeable wall wrap in the market out rating CSR Proctor.
Super Permea is Codemark certified and exceeds all relevant Australian Standards.
